To Our Friends and Customers:

WE take pleasure, with the advent of another planting season, in presenting this instructive booklet listing the hardy and tested varieties of plants suitable for this district, with proper instructions for their successful cultivation.

Visitors are always welcome to inspect our store and nursery. It is situated in a garden district where there is plenty of parking space for cars. Having a seed-store and nursery combined, patrons will find it convenient to make all their garden-supply purchases at one time. Courtous and expert advisers are always on hand to help.

Thank You. We thank the many patrons who favored us with orders during the past season, and trust that everything we supplied came fully up to expectations.

Please Order Early. The best time is just as soon as this catalog reaches you. The stock may not be ready by then, but your order will be given immediate attention, and be filled just as soon as the stock is available.

Terms. Cash must invariably accompany order. Our prices are very low—as low as consistent with honest treatment and first-class stock—and we cannot, under any circumstances, open an account or do a credit business, regardless of how responsible a customer may be. Our liberal terms of prepayment and low prices will not admit it. All postpaid items are delivered free within the Fourth Zone.

On all plant orders to be sent Parcel Post for less than \$1 add 15c to cover cost of packing and postage. Do not forget to add the State Sales Tax. See page 5.

C. O. D. Orders. We do not send goods "Collect on Delivery" outside of San Francisco.

Making Out an Order. Please write all orders plainly. Be sure to sign your name to the order, and give your post office address, county, and state, also express office address if different from that of the post office. Please keep a copy of your order to check up stock on arrival. Make remittance by Bank Draft, Post Office or Express Money Order, or Personal Check, payable to the Sunset Seed and Nursery Company.

Substitutions. As a rule, we do not substitute unless given permission to do so. Occasionally a variety may be sold out, and on small items it is generally better to make a good substitution than to send the order short. When ordering late in the season, it is always best to name a second choice—but it is always the customer's privilege to order "no substitutions." We rarely have to substitute except at the end of the season, but it is best to provide for the contingency. Our advice is to order early.

Safe Arrival Guaranteed. We guarantee all stock to reach customers in good condition. Any just complaint should be made at once upon receipt of shipment. We ship to nearly every state in the Union, and with many years' experience in packing and shipping, we can safely agree to deliver stock to the most distant points in good condition. In case of unreasonable delay in arrival of stock, notify us, send copy of order, when originally mailed, how remitted, and amount.

Non-Warranty. Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep and too shallow plantings, slugs, etc., therefore we give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., we send out, and will be in no way responsible for the crop.

Nursery Department

We offer only the highest quality nursery stock obtainable. It is clean, healthy, and always gives satisfaction. Inspection invited.

When our busy season commences, we are rushed with orders, but there will be no unnecessary delay in shipping. We aim to ship orders the same day as received.

Guarantee. We warrant all trees and plants to be good and thrifty, but having no control over them after delivery to the transportation companies or over the planting and care after they are received by the buyer, we will not be responsible any further than stated. We exercise great care to have our nursery stock true to name. Nevertheless, should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

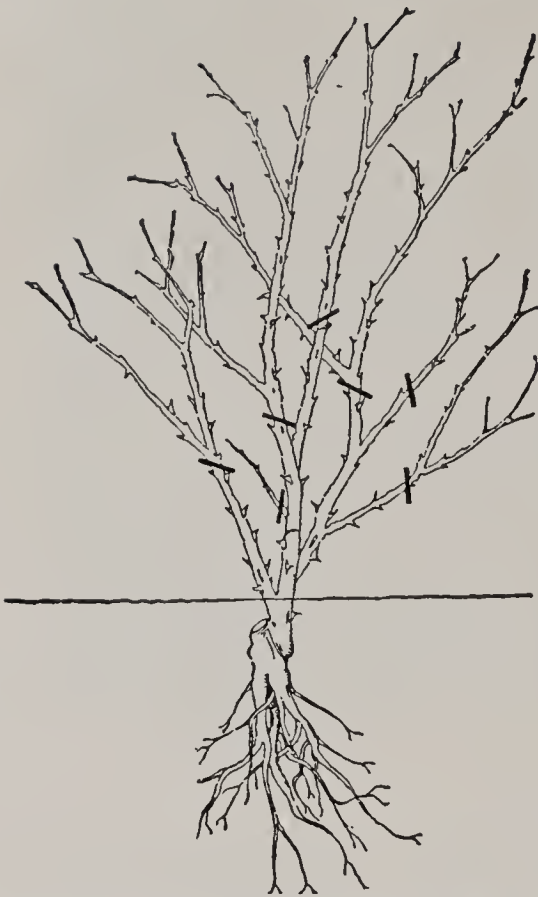

NURSERY INSPECTION. Our nursery stock is inspected by Government inspectors, and our nursery is regularly inspected by county and state inspectors. Nevertheless, it is necessary by a state law that all shipments be inspected again when entering another county or state. If you have no local inspection service, the postmaster will forward the parcel to the nearest inspector. Ask your postmaster for particulars. If you have no inspector in your locality kindly mention this in your order so we may ship the parcel to the nearest inspector who will then forward it to you without delay.

All nursery stock shipped at purchaser's expense, except where marked postpaid. We deliver all nursery stock free in San Francisco. Items marked postpaid are delivered free within the Fourth Zone.

The Rose—Queen of All Flowers

A good Rose as received. The black lines show where to prune before planting.

Our Slogan— "Always Reliable"

is jealously safeguarded, and we will continue to distribute only the very best tested horticultural products possible. The prices herein quoted are the fairest possible, consistent with high quality, honest dealing, and first class service. You can depend on **Sunset** at all times.

The black bar shows where to cut a Rose. Let two leaves remain on the bush.

The Rose is our leading specialty because it is the most popular of flowers. This is as it should be, for it rightfully deserves the title of "Queen of Flowers." The Rose has been constantly improved in color, form, and blooming qualities. We have tried earnestly to keep abreast of these new creations and have helped to introduce many of the new popular Roses. We have also experimented extensively with rootstocks for budding, and now can safely say we have the **best root** obtainable to produce the finest Roses over the longest period. The success of your Rose garden is assured in placing your order with us. We are the largest dealers of high-grade budded Roses in San Francisco.

Remember that handling plants is our main business—not a sideline, as it is in department and hardware stores. Our Roses are handled as they should be with regard to the fact that they are alive and should be treated as living things. We do not dip them into boiling wax or expose them unnecessarily to heat and drought. **Our Roses will grow.**

Plant Roses in November, December, January, February, March, and April

The Grading of Roses

The public is led to believe in many cases that all two-year-old Roses are one grade. That is not so; for Roses are graded according to standards set by the American Nurserymen's Association. The difference between No. 1, 1½, 2, or 3 grades is such that unless one is familiar with comparative grades he is easily misled. Investigate where and what you are buying. Do not be misled by cheap prices for low grades. The best is never costly. We handle over 35,000 Rose bushes in our nursery. Come out and see this fine, healthy stock.

Rose Culture

In deep, rich, heavy soil, even inclined to adobe, Roses are strong and vigorous, with flowers of great substance. But even in a light, sandy soil, Roses can be made to grow well, and they flower, as a rule, earlier than in heavy soil. To improve light soils, add clay, peat or adobe, and use our Special Sunset Fertilizer. See page 46. Do not apply strong fertilizers directly to the roots, but dust it on the surface and rake in slightly after the bushes are planted.

Should the roots appear to be dry on arrival, mix up some soil and water and "puddle" the roots in it for several hours before planting. In planting, thoroughly soak before adding the surface soil. This insures every portion of the root being thoroughly covered and prevents cracking of the surface. Frequent cultivating of the surface is absolutely necessary to keep this loose soil or "mulch," especially after watering. Plant each bush so that the point where it is budded is 2 to 3 inches below the ground. Do not sprinkle the tops of Rose bushes in the late afternoon as it causes mildew and other fungous trouble.

Pruning

This should be done during December, January, and February. At that time the bushes are dormant. Cut just above a prominent but dormant bud that points outward. It is difficult to give full information about pruning, but it might be summed up as follows:

Remove all small, twiggy growth, cutting back to strong, well-ripened canes which are well furnished with healthy, big, dormant eyes. As a general thing, the entire top of the plant should be removed. See illustration above.

Note: Our Roses are used by the U. S. Government. We supplied hundreds of bushes to the Letterman General Hospital at the Presidio, Fort Mason, Navy Yard, Mare Island, and other posts. Our Roses have the quality required by rigid Government inspection. You will make no mistake in trusting us with your orders. Satisfaction guaranteed.

Sunset Rose Novelties

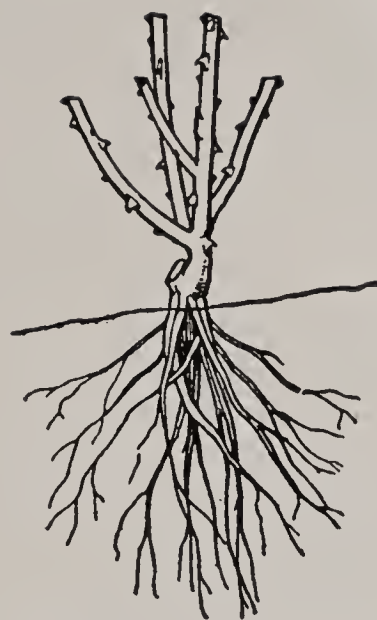

- ***Ambassador.** H. T. A Rose that has proved a great success in the past year. The beautiful bronzy salmon bud is borne singly on a strong stem and is similar to Talisman in form but uniform in color. Foliage dark and leathery. A profuse bloomer and intensely fragrant. **\$1.00 each.**
- ***Amelia Earhart.** H. T. Plant Patent No. 63. Large ovoid bud, cream with blushes; flowers very full, graduating from a deep yellow center to an outer collarette of large cream petals with a blush overtone; extremely fragrant; strong grower, free bloomer; leathery dark green foliage. A worth-while addition. **\$1.50 each.**
- ***Better Times.** H. T. Plant Patent No. 23. The brilliant cerise flowers are large, double, and delicately fragrant. Being produced on long strong stems, they are excellent for cutting; foliage is leathery, dark green, a very free, full bloomer. **\$1.50 each.**
- ***Carmelita.** H. T. Plant Patent No. 91. Large ovoid bud of E. G. Hill color; flowers vivid red, color same on both sides of petals without variations. A vigorous grower with abundant large leathery dark green foliage. A new American Rose of great promise. We recommend it highly. **\$2.00 each.**
- ***Countess Vandal.** H. T. **\$1.00 each.** See page 7.
- ***Dotty.** H. T. Superb Rose of golden apricot and tawny orange-yellow. Vigorous, free-flowering, with healthy, holly-like foliage. **75c each.**
- ***Edith Krause.** H. T. Probably one of the most beautiful white Roses in existence. Very large white bud with a greenish tint, opening to a majestic, perfumed bloom of pure white. Long, strong stems for cutting. Unusually hardy. **\$1.00 each.**
- ***Mary Hart.** H. T. **\$1.00 each.** See page 2.
- ***Max Krause.** H. T. Probably the finest yellow Rose for outdoor use—a gold-yellow that stays gold. Long bud and cup-formed bloom of great substance freely borne on a long stem. Foliage leathery and unusually resistant to Rose troubles. **\$1.50 each.**
- ***Nigrette.** H. T. Plant Patent No. 87. "The Black Rose of Sangerhausen." The cup-shaped flowers are intensely deep maroon with blackish velvet sheen and are deliciously fragrant. It is the darkest of Roses,—appearing almost black from a little distance. The petals do not burn in the sun. The plant is continuously in bloom, spending most of its energy in forming blossoms. The sensation of the European rose world is now available for the first time in this country. **\$2.00 each.**
- ***Souvenir.** H. T. **\$1.00 each.** See page 7.
- ***Token.** Plant Patent No. 95. Large Ophelia-shaped bud. The full, double flowers are a single toned glowing orange; a unique color. It is a free bloomer and has an upright growth in the garden. The flowers are very lasting and are pleasing at all stages. The glossy foliage is disease-resistant. **\$1.50 each.**

Novelty Climbers

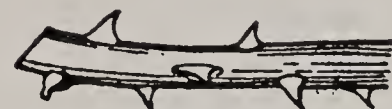

- ***Blaze.** **\$1.50 each.** See page 7.
- ***Golden Climber** (Mrs. Arthur Curtiss James). Plant Patent No. 28. The most interesting and unusual feature is that its extreme hardiness is combined with blooms of Hybrid Tea type and quality; long lasting and most always solitary on stems often 18 inches or longer. It is very hardy, being able to withstand sub-zero temperatures. The handsome glossy green wood and red thorns are very ornamental. **\$2.00 each.**
- ***Climbing Etoile de Hollande.** H. T. Fragrant and thrifty, with beautiful blossoms, large and bold. The color is a glorious deep red. **75c each.**
- ***Climbing Queen Alexandra.** H. T. Probably one of the most popular Roses in the bush form. Now we have it in a vigorous climber. Outside of petals old gold, inside bright vermilion. **75c each.**

See other Climbers, page 11.

Properly nourished rose bushes resist most fungus troubles. **Sunset Special Garden and Lawn Fertilizer** fills this need. (See page 46). Your roses will respond to it quicker than any other plant food. It possesses the proper elements of nutrition essential to vigorous growth, luxuriant foliage and beautiful long-stemmed blossoms. It quickens blooming and furnishes a steady long-lasting supply of nourishing food. Use 3 to 4 tablespoonfuls to a bush. Water in well after applying. Never put it directly on the roots.

Planted wrong. Not deep enough.

Correct way to prune. Cut clean, slightly sloped, just above the eye.

Rose Prices

If 5 to 25 Roses are ordered, you may deduct 10% from the total amount. If over 25, 20% may be deducted. We cannot fill Rose or plant orders for less than \$1.00 unless 15c is added to cover cost of postage and packing.

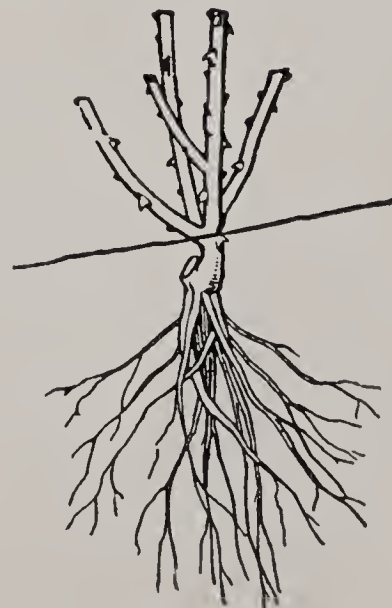

We pay shipping charges on Bush and Climbing Roses within the Fourth Zone by Parcel Post or Express, at our option.

These Everblooming Roses

35c each; 3 for \$1.00; 12 for \$3.50, postpaid

Two-year-old selected stock. Field grown.

The Roses offered on this page are not the top number one grade, but lighter stock than offered in our general Rose list. Yet these bushes are far superior to those sold in Department stores, etc., as they are freshly dug and handled by experts. Besides they are never allowed to dry out and are not dipped in boiling wax. They will all grow and bloom profusely this spring.

Tree Roses

The stately Tree Roses, with their symmetrical, globular heads, are of great beauty, making very imposing plants for lawn or plant borders. These we offer in the Hardy Everblooming class. We call special attention to our up-to-date collection of Standard Roses which we consider are the most popular varieties. The quality is of the highest. Strong well-branched trees, 4 to 5 feet high, on stout stems. These are too large to go by Parcel Post and must go by Express, collect. For description of these varieties, see general Rose list.

Price, \$2.00 each. Extra selected, 6 or more at \$1.75 each.

Gorgeous Rhododendrons

See back cover for colored illustration and other collections.

The magnificent display of these splendid shrubs attracts thousands of visitors to Golden Gate Park during the blooming season. Rhododendrons are not tender plants as many people suppose. They do well most anywhere, if planted in a partially shaded location. Our named varieties are grafted or raised from cuttings (which are sometimes superior to grafts), well branched, and bear flower-buds with the exception of the smaller sizes, which will bloom next year. Do not confuse these varieties with wild types which do not grow out of their native habitat. Ready for planting about September 15 and through winter until May.

Buy them small and watch them grow. Special planting instructions are enclosed with each order.

Hardy Flowering and Bedding Plants

Grown from the highest quality seed obtainable.

We grow most of the popular flowering and ornamental plants from seed in boxes for our spring trade. Anyone can have a successful garden with the least amount of care at a saving of considerable time from these small plants, which are generally 4 to 6 inches high at time of sale—February to June. We carry certain flowering plants all year round. If interested, get in touch with us.

The bedding plants offered below are all in flats which do not always contain the same number of plants. We sell the flats as they come from the nursery. Some contain 100 and some less. The price on all flats is the same—\$1.50 per flat, except where otherwise stated.

If your order amounts to less than \$1.00, add 15c to cover cost of packing and mailing.

Annuals

Some of our most popular cutting and bedding flowers are annuals. All are very free flowering and satisfactory. Be sure to order from this list if you want quick returns.

Unless noted, plants are furnished from February to June.

Tuberous-rooted Begonias

Plant from January to May

Our collection of these lovely summer-flowering bulbous plants is very fine indeed. A general impression prevails that Tuberous Begonias are more or less delicate in their nature, consequently hard to handle or grow. As a matter of fact they may be grown with almost the same ease as a geranium.

Cultural Directions: They require rich soil and plenty of moisture for best results. Above all, see that they have good drainage. Use one-third each of sand, peat and loam. Mix well and plant the bulbs about one-half inch deep. For outdoor culture place the bulbs about 15 inches apart each way. They should be planted in part shady or shady locations, and do very well outdoors. They can also be grown as pot-plants indoors. One bulb in a 6- or 7-inch pot is the general practice. Several bulbs can be planted in larger pots. Remember the north side of a building, a north wall, or other shady spot is just the place for these beautiful plants.

Giant Double-Flowered. We can supply the following separate colors: White, Red, Orange, Yellow, Rose, Scarlet, Salmon, Pink and Mixed. 15c each; \$1.50 per doz.; \$2.75 for 25; \$5 for 50; \$9.50 per 100; \$85 per 1000, postpaid.

Giant Single-Flowered. These often have flowers that measure 7 inches across. We can supply the following separate colors: Rose, Pink, Salmon, Crimson, Scarlet, Yellow, White, Orange and Mixed. 15c each; \$1.50 per doz.; \$2.75 for 25; \$5 for 50; \$9.50 per 100; \$85 per 1000, postpaid.

Crispa. (Ruffled Type). This is a large-flowered sort with ruffled and fluted edges. Mixed colors only. 15c each; \$1.50 per doz.; \$2.75 for 25; \$5 for 50; \$9.50 per 100, \$85 per 1000, postpaid.

Lloydi. (Hanging-basket Type). This is a new sort with long, drooping stems and beautiful clusters of flowers. They are best suited for baskets, pots, and porch-boxes. 25c each; \$2.50 per doz., postpaid.

Tuberous Rooted Begonia.

Giant Hyacinths.

Highest Quality Imported Dutch Bulbs

Our bulbs have produced blossoms which have been awarded first prizes at flower shows in many sections of the country.

25 bulbs of any one variety supplied at the 100 rate, except Begonias, which are especially priced in this quantity.

GIANT HYACINTHS Prize-Winning Imported Varieties

(Plant from September to January)

Hyacinths are very easy to grow out-of-doors, in pots or fancy jardinières with bulb fiber, or in Hyacinth glasses with water. For outdoor growing set the bulbs from 4 to 5 inches deep and 7 to 8 inches apart in loose soil or sand; give them extra depth to produce roots so that they will take food value from the soil.

For pot-growing, use sandy loam and bury the pots in the garden for five or six weeks or keep in a dark place to produce roots; then bring them into the house to force into blooming.

The Hyacinths we offer will all produce beautiful, full blooms that will be the pride of your garden.

Fancy Imported Giant Darwin Tulips

This favorite type excels in brilliancy of colors, perfect form of flowers, and long stout stems. As cut-flowers they are of great value, being good keepers. Our well-balanced list of varieties will help our customers to choose a collection of these bulbs which will give satisfaction.

Tulips are very satisfactory, both for garden and pot culture. They require very little attention, and will grow in any fairly good soil. The soil should be forked deeply, then given a coating of Sunset Special Fertilizer. See page 46. Plant bulbs 4 to 5 inches deep, 5 to 6 inches apart, from September to January. These planting directions apply to all the different types.

OUR GIANT-FLOWERING GLADIOLUS

(Plant from November to May)

Our Gladiolus bulbs are of the highest quality, selected to produce the finest long-stemmed blossoms of mammoth size. They should be planted about 4 inches deep and 7 to 8 inches apart. Any good garden soil will make strong plants and good bloom, but a light application of Special Sunset Fertilizer, applied on the top of the ground after the plants are several inches high, will aid in producing larger blooms. Keep the ground moist until the flower-spikes begin to appear, then water freely. The bulbs should be taken up in the fall, after the leaves have become yellow, and then stored in a cool, dark place, free from frost.

SUNSET Prize-Winning Dahlias

CULTURAL DIRECTIONS: Although Dahlias are easily grown in any good garden soil, they respond readily to good cultivation.

Prepare the soil by digging 12 to 18 inches deep and working in a moderate amount of Sunset Special Fertilizer. Plant the tubers 2½ to 3 feet apart, at a depth of 5 to 6 inches. Give them just enough water when above ground to keep them growing slowly. Apply fertilizers and water in quantities only after the plant commences to bud. Dahlias may be planted from March to July, preferably in May.

All Dahlia tubers are postpaid.

Highest Quality Flower Seeds

Space does not permit our listing all descriptions and varieties of the large assortment of seeds we carry. We can, however, supply practically any seed desired on request. We pack all our own seed and can assure our customers that they are absolutely fresh, as the tremendous demand for our seeds keeps our stock moving fast.

How to Raise Flowers Successfully from Seed

It is better in most instances except hardy annuals, to start the seed in shallow boxes about 4 inches deep, using very sandy soil with leaf-mould, so that it will not bake, and provide for drainage by boring some holes in the bottom of the box. Set the boxes in a warm sheltered place, but protect from direct sunlight, as the seed is liable to be scorched. When the plants have made the fourth leaf, they should be pricked out, reset in another box or in pots, and when well started they should be transplanted into the garden. If the seed is to be sown directly in the garden, it should be done after the soil is well worked and fertilized. A slight depression should be made with a stick, the seed sown, and then covered with sharp sand about twice the depth of the diameter of the seed. The sand will prevent the crusting over of the soil after watering.

A common mistake in sowing flower seed as well as other seed is covering too deep. As a general rule, cover only to the depth of the thickness of the seeds. Always press the earth down firmly after sowing all flower seeds, else there is a danger of their drying up before the roots can get firm hold of the soil. Seeds of the hardier annuals may be sown where they are to grow.

The weeds should be kept down and the ground loosened often so that the plants will receive the full benefit of the rains and dews, which they will not do if the ground is allowed to become hard and baked. Water often.

It is very important to procure the best grade and quality of seed. One trial will prove to you we have the finest quality available.

We have classified the flowers as to annuals, perennials, etc., also the average heights and the months they can be planted in this section.

Calendula, Orange Radio.

Giant Exhibition Begonias

This is the finest seed obtainable and was carefully selected and gathered by the Begonia specialist in charge of our bulb-growing fields. Plants bloom the first season from seed, if sown in February or March in a temperature of 60 degrees. To secure the best results for outdoor planting, they should be set out as soon as the ground becomes warm. They are covered the whole summer with bright and elegant flowers. **Double Mixed. Pkt., 35c.**

Annual Canterbury Bells

Asters

Improved New Giant California Sunshine.

This wonderful Aster is a decided improvement over the old California Sunshine. The clear and beautiful colors are varying shades of pink, rose, blue, and lavender. A dual-tone effect is obtained through contrasting light yellow and blue centers. The outer or guard petals are somewhat loosely placed, creating an airy, lace-like effect which is altogether charming. The flowers measure 4 to 5 inches across and are borne on heavy stems fully 18 to 20 inches long. **Mixed Colors. Pkt., 15c; ⅛ oz., 50c.**

Sunshine Aster.

Pompon Asters.

A pretty little Aster bearing a great profusion of dainty, button-like flowers with quilled petals. 12 to 15 inches. **Rose, White, Red, Blue or Mixed Colors. Pkt., 15c; ⅛ oz., 40c.**

New Virginia Stock, Compact Crimson Gem

This popular border plant grows easily and attracts attention wherever seen. The color is a bright carmine-crimson. Pkt., 10c; ½ oz., 20c; oz., 30c.

Venidium Fastuosum

Of the many flowers which South Africa has contributed to our gardens, this new Venidium stands out as one of the best. It is known under the popular name of "Monarch of the Veldt." The plants grow 2 to 3 feet tall and bear many large, daisy-like blooms 3 to 4 inches across. The ray-petals are brilliant orange, with a purple-black zone and a unique center of woolly green. Pkt., 20c; ¼ oz., \$1.00.

Giant Dahlia-Flowered Zinnias

The plants of this new race are strong and vigorous, fully 3 feet high, producing many flowers with stout stems, in a wide range of colors. When in full bloom, the flowers often measure 4 inches in depth and 6 to 8 inches in diameter, closely resembling Show Dahlias.

Crimson Monarch. By far the largest and best of the red shades. Flowers often 8 inches in diameter.

Dream. A fine deep lavender, turning to purple.

Our Giant Orchid-Flowering Spencer Sweet Peas

Plant September to June

How to Grow Sweet Peas Successfully

Prepare the soil with a liberal dressing of our specially prepared Sunset Fertilizer. Sweet Peas are heavy feeders. Cutting the blossoms greatly prolongs the flowering season. The soil should be deeply dug and thoroughly mixed with the Fertilizer. Make a trench about 5 to 6 inches deep, planting the seeds 3 to 4 inches apart and covering them 1 inch deep with good soil. After planting, tread the soil tightly over the seeds or firm it with any suitable implement. Thoroughly soak the bed, and remember to keep it always moist, as any dryness after seeds germinate is fatal.

When the plants are 6 inches high, pinch out an

High-Quality Lawn Seeds

WE SPECIALIZE
IN HIGH-GRADE
LAWN SEED

Our Lawn Seeds are the finest and highest grade obtainable. We supply large quantities of our seed to the Government Posts in and around San Francisco and also to the Navy Department.

How to Produce a Good Lawn

Lawns can be made in California any month of the year, but if made from September to May will require less care and water. The ground should be well prepared and the soil should not be too rich, as it is not desirable to have a rapid growth when starting a lawn.

After the ground is thoroughly worked, roll it before seeding, to prevent it from settling unevenly, and then rake the surface lightly. Sow the seed so as to cover the ground thoroughly, and then cover it lightly with soil. Roll again so as to press the seed in firmly. If you have no roller, use boards and tramp on them so as to pack the ground firmly, but a roller is preferred. If you do not pack the ground firmly, the seed will grow in spots, and the mower will ruin the lawn because the soil is loose.

Grass seed will germinate in from 8 to 15 days, according to the weather. If a lawn is made during the summer, the ground should be covered lightly with peat after the seed has been rolled, so as to retain the moisture. New lawns should not be allowed to dry out, not even for a half day. For the first 15 days the lawn should be watered twice a day if necessary.

A lawn should be fertilized after the first cutting. We recommend Sunset Special Lawn and Garden Fertilizer. See page 46.

If these directions are followed, the seed will quickly produce a firm, deep, velvety, and elastic turf, with no tendency to stool or grow in clumps. It will be deeply rooted and hold its beautiful emerald-green color throughout the season. To keep this beautiful color lawns should be fertilized with lawn dressing twice a year. If barnyard manure, which is often full of weeds, is used, it will cost more to remove the weeds than to put in a new lawn.

Sow the seed thick enough at the start and save yourself a lot of unnecessary work. Use 1 pound to a space 10x10 feet.

WARNING. Do not use the so-called rotted manure which is being sold to inexperienced gardeners. It is full of wild clover and other weed seeds. Pests, such as slugs, snails, beetles, etc., get a start in most gardens through eggs and larvæ in such manure. It is expensive when you take into consideration that a few pounds of good fertilizer is equal to a sack of manure. If you want a moisture-holding material for top-dressing use Peat; it is **clean**.

All prices on Lawn Seed are postpaid within the Fourth Zone.

Australian Rye Grass. A vigorous, quick-growing Lawn Grass, but a little coarse. Very satisfactory for lawns in San Francisco. Best grass for sandy soils. **Lb. 30c; 10 lbs. \$2.50.**

Pacific Rye Grass (Genuine Pacey's Rye Grass). This Grass is similar to the Australian Rye Grass but has a finer leaf and is longer lived. **Lb. 35c; 10 lbs. \$3.00.**

Chewing's Fescue. Forms a close, lasting turf, succeeding well under poor conditions. It is used extensively in lawn and putting-green mixtures. **Lb. 70c; 10 lbs. \$6.50.**

Creeping Bent. (Genuine Seaside). Being of fine texture, this Grass is excellent for lawns and putting greens, as it makes a low, velvety growth. **Lb. \$1.50; 10 lbs. \$12.50.**

Kentucky Blue Grass. Fancy; extra clean. The most popular Grass for lawns. It is dark green and

of dense growing habit, making a beautiful turf in a heavy or black soil. **Lb. 60c; 10 lbs. \$5.50.**

Red-Top Grass. Gives a quick effect and succeeds on all soils, though doing best on moist soils. Should be in all lawn mixtures. **Lb. 40c; 10 lbs. \$3.50.**

White Clover. Of dwarf habit, with creeping stems, rooting at joints, thus making an excellent turf that stands constant tramping. Used for lawn-planting, either alone or in mixture with Grass Seed. **Lb. 65c; 10 lbs. \$6.00.**

Park Lawn Mixture. (Formerly known as Golden Gate.) This mixture of hardy Grasses contains a little white clover and forms a thick strong turf that will stand hard usage. **Lb. 40c; 10 lbs. \$3.75.**

Shady Nook Mixture. Contains Grasses for making good lawns in shady places and under trees. **Lb. 60c; 10 lbs. \$5.00.**

SUNSET SPECIAL LAWN MIXTURE

This Mixture will produce the finest lawn in almost any location. It is composed of five grasses and white clover, and is the result of many years' experience. It will produce that beautiful velvety green lawn that everyone admires. One pound will sow a space 10x10 feet. **Lb. 60c; 5 lbs. \$2.75; 10 lbs. \$5.00.**
